

# Maths Curriculum Reception to Year 6.

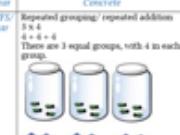

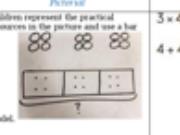

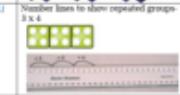

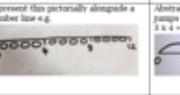

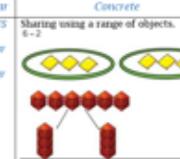

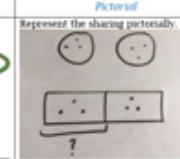

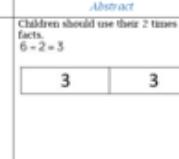

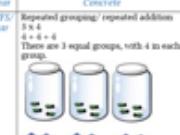

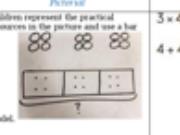

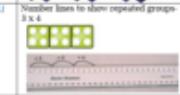

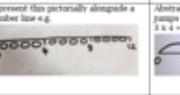

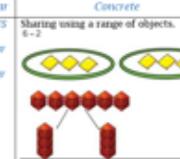

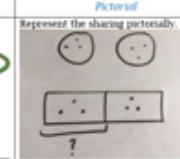

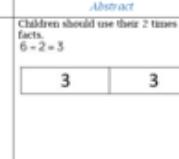

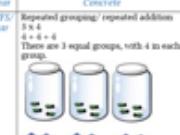

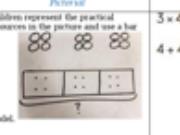

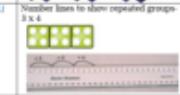

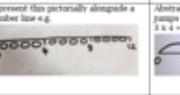

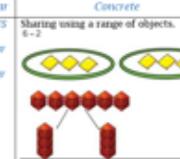

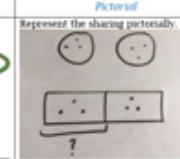

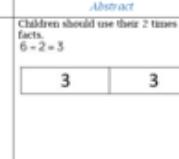

Based on NCETM Small steps.

## Reception:

EYFS Statements	Early Learning Goals		By the end of Reception children should know... (Small steps)	Activities & Opportunities	Vocabulary
<p>Developing a strong grounding in number is essential so that all children develop the necessary building blocks to excel mathematically. Children should be able to count confidently, develop a deep understanding of the numbers to 10, the relationships between them and the patterns within those numbers. By providing frequent and varied opportunities to build and apply this understanding - such as using manipulatives, including small pebbles and tens frames for organising counting - children will develop a secure base of knowledge and vocabulary from which mastery of mathematics is built. In addition, it is important that the curriculum includes rich opportunities for children to develop their spatial reasoning skills across all areas of mathematics including shape, space and measures. It is important that children develop positive attitudes and interests in mathematics, look for patterns and relationships, spot connections, 'have a go', talk to adults and peers about what they notice and not be afraid to make mistakes.</p>	<p><b>ELG: Number</b>          Children at the expected level of development will:         <ul style="list-style-type: none"> <li>- Have a deep understanding of number to 10, including the composition of each number;</li> <li>- Subitise (recognise quantities without counting) up to 5;</li> <li>- Automatically recall (without reference to rhymes, counting or other aids) number bonds up to 5 (including subtraction facts) and some number bonds to 10, including double facts.</li> </ul> <b>ELG: Numerical Patterns</b>          Children at the expected level of development will:         <ul style="list-style-type: none"> <li>- Verbally count beyond 20, recognising the pattern of the counting system;</li> <li>- Compare quantities up to 10 in different contexts, recognising when one quantity is greater than, less than or the same as the other quantity;</li> <li>- Explore and represent patterns within numbers up to 10, including evens and odds, double facts and how quantities can be distributed equally.</li> </ul> </p>	<p><b>Cardinality &amp; counting</b></p> <p><b>Comparison</b></p> <p><b>Composition</b></p> <p><b>Pattern</b></p> <p><b>Measures</b></p> <p><b>Shape &amp; Space</b></p>	<p>1 Counting: saying number words in sequence.          2 Counting: tagging each object with one number word          3 Counting: knowing the last number counted gives the total so far          4 Subitising: recognising small quantities without needing to count them all          5 Numeral meanings          6 Conservation: knowing that the number does not change if things are rearranged (as long as none have been added or taken away)</p> <p>1 More than / less than          2 Identifying groups with the same number of things          3 Comparing numbers and reasoning          4 Knowing the 'one more than/one less than' relationship between counting numbers</p> <p>1 Part-whole: identifying smaller numbers within a number (conceptual subitising – seeing groups and combining to a total)          Inverse operations          2          3 A          4 A          5          number can be partitioned into different pairs of numbers          number can be partitioned into more than two numbers          Number bonds: knowing which pairs make a given number</p> <p>1 Continuing an AB pattern          2 Copying an AB pattern          3 Make their own AB pattern          4 Spotted an error in an AB pattern          5 Identifying the unit of repeat          6 Continuing an ABC pattern          7 Continuing a pattern which ends mid-unit          8 Make their own ABB, ABCB patterns          9 Spotted an error in an ABCB pattern          10 Symbolising the unit structure          11 Generalising structures to another context or mode          12 Making a pattern which repeats around a circle          13 Making a pattern around a border with a fixed number of spaces          14 Pattern-spotting around us</p> <p>1 Recognising attributes          2 Comparing amounts of continuous quantities          3 Showing awareness of comparison in estimating and predicting          4 Comparing indirectly          5 Recognising the relationship between the size and number of units          6 Beginning to use units to compare things          7 Beginning to use time to sequence events          8 Beginning to experience specific time durations</p> <p>1 Developing spatial awareness: experiencing different viewpoints          2 Developing spatial vocabulary          3 Shape awareness: developing shape awareness through construction          4 Representing spatial relationships          5 Identifying similarities between shapes          6 Showing awareness of properties of shape          7 Describing properties of shape          8 Developing an awareness of relationships between shapes</p>	<p><a href="http://nctm.org.uk">National Centre for Excellence in the Teaching of Mathematics (nctm.org.uk)</a></p> <p><a href="http://nctm.org.uk">National Centre for Excellence in the Teaching of Mathematics (nctm.org.uk)</a></p> <p><a href="http://nctm.org.uk">National Centre for Excellence in the Teaching of Mathematics (nctm.org.uk)</a></p> <p><a href="http://nctm.org.uk">National Centre for Excellence in the Teaching of Mathematics (nctm.org.uk)</a></p> <p><a href="http://nctm.org.uk">National Centre for Excellence in the Teaching of Mathematics (nctm.org.uk)</a></p> <p><a href="http://nctm.org.uk">National Centre for Excellence in the Teaching of Mathematics (nctm.org.uk)</a></p>	<p>amount, backwards, collection, count, few, fewer (than), forwards, how many, larger, less (than), more (than), number, numeral, same, smaller, subitise, after, before, different, represent, zero</p> <p>1 less, 1 more, add, add more, altogether, first, left, now, part, take away, whole</p> <p>continue, copy, mistake, repeat, repeating, pattern, same, unit of repeat,</p> <p>big, bigger, large, little, small, smaller, height, length, long, longer, longest, measure, short, shorter, shortest, tall, taller, tallest, balanced, balancing, scales, empty, float, full, heavier, heaviest, heavy, least, less, light, lighter, lightest, mass, more, most, narrow, sink, tall, thin, weight, wide, after, afternoon, before, clock, day, evening, later, lunchtime, minute, morning, night, night-time, today, tomorrow, week, weekend, yesterday</p> <p>2-d shape, 3-d shape, circle, cone, corner, cube, cuboid, curved, cylinder, face, flat, pyramid, rectangle, rotate, set, sides, solid, sort, sphere, square, straight, surface, triangle, above, around, backwards, below, beside, bottom, forwards, map, next to, position, route, top</p>

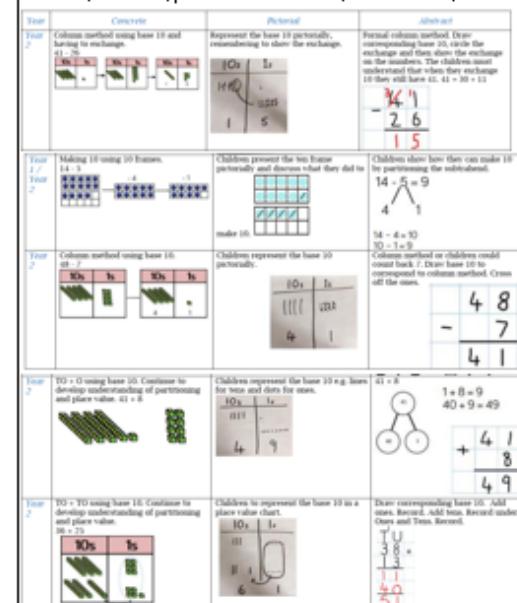

## Year 1

Prior Knowledge - Reception	Year 1	NC Objectives	By the end of Year 1 children should know... (Small steps)	Vocabulary	Concrete Pictorial Abstract must haves!																												
<b>Cardinality &amp; Counting</b> 1 Counting: saying number words in sequence. 2 Counting: tagging each object with one number word 3 Counting: knowing the last number counted gives the total so far 4 Subitising: recognising small quantities without needing to count them all	5 Numerical meanings 6 Conservation: knowing that the	count to and across 100, forwards and backwards, beginning with 0 or 1, or from any given number I count, read and write numbers to 100 in numerals; count in multiples of twos, fives and tens I given a number, identify one more and one less I identify and represent numbers using objects and pictorial representations including the number line, and use the language of: equal to, more than, less than (fewer), most, least I read and write numbers from 1 to 20 in numerals and words.	<a href="#">Number&amp;place value (sm steps) '1&amp;1'</a>	compare, count on, digit, fewest, greater than, greatest, less than, most, one(s), order, partition, represent, ten(s), ordinal numbers (first, second, third)	Base 10 Place Value counters place value grid, numicon, number lines, 100 squares.																												
<b>Comparison:</b> 1 More than / less than 2 Identifying groups with the same number of things 3 Comparing numbers and reasoning 4 Knowing the 'one more than/one less than' relationship between counting numbers	6 Addition and Subtraction	read, write and interpret mathematical statements involving addition (+), subtraction (-) and equals (=) signs I represent and use number bonds and related subtraction facts within 20 I add and subtract one-digit and two-digit numbers to 20, including zero I solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems such as $7 = \square - 9$ .	<a href="#">+ &amp; - (sm step) '1&amp;1'</a>	addition, add together, subtraction, subtract, difference, double, efficient, equal to, fact family, greater, group, inverse, less, minus, near double, number bond, plus, symbol, systematic, total	<p>Base 10 Place Value counters place value grid, numicon, number lines, 100 squares.</p> <table border="1"> <thead> <tr> <th>Year</th> <th>Concrete</th> <th>Pictorial</th> <th>Abstract</th> </tr> </thead> <tbody> <tr> <td>2/3/5 Year 1</td> <td>Combining two parts to make a whole (use resources e.g. eggs, shells, bear, cars etc.)</td> <td>Children represent the cubes using dots or crosses. They could put each part into a part-whole model.</td> <td><math>4 = 3 + 1</math> Four is a part, 3 is a part and the whole is 7.</td> </tr> <tr> <td>Year 1</td> <td>Counting in tens: number lines, squares or cubes.</td> <td>It has model which encourages children to count on rather than count all.</td> <td>7 is a whole number line. What is 2 more than 4? What is the sum of 7 and 4? What is the total of 4 and 2? <math>4 + 2 = 6</math></td> </tr> <tr> <td>2/3/5 Year 1</td> <td>Counting back: tens: number lines or number track. Children start with 10 and count back.</td> <td>Children represent what they see pictorially.</td> <td><math>4 - 2 = 2</math></td> </tr> <tr> <td>Year 1</td> <td>Regrouping to make 10. Use ten frames and counters/ cubes or using squares.</td> <td>Children draw the ten frame and counters/ cubes.</td> <td>Children develop an understanding of equality e.g. <math>6 + \square = 11</math> <math>6 + 5 = 5 + \square</math> <math>6 + 5 = \square + 4</math></td> </tr> <tr> <td>Year 1</td> <td>Finding the difference: using cubes, squares or other concrete objects which they have used or use the bar model to illustrate what they have done.</td> <td>Children draw the cubes, squares or other concrete objects which they have used or use the bar model to illustrate what they have done.</td> <td>Find the difference between 8 and 5. <math>8 - 5</math>, the difference is <input type="checkbox"/> Children to explore why <math>9 - 6 = 8 - 5 = 7 - 4</math> have the same difference.</td> </tr> <tr> <td>Year 1 / Year 2</td> <td>Making 10 using 10 frames, 10 squares or 10 cubes.</td> <td>Children present the ten frame pictorially and discuss what they did to make 10.</td> <td>Children draw how they can make 10 by partitioning the subtrahend. <math>14 - 4 = 10</math> <math>10 - 1 = 9</math></td> </tr> </tbody> </table>	Year	Concrete	Pictorial	Abstract	2/3/5 Year 1	Combining two parts to make a whole (use resources e.g. eggs, shells, bear, cars etc.)	Children represent the cubes using dots or crosses. They could put each part into a part-whole model.	$4 = 3 + 1$ Four is a part, 3 is a part and the whole is 7.	Year 1	Counting in tens: number lines, squares or cubes.	It has model which encourages children to count on rather than count all.	7 is a whole number line. What is 2 more than 4? What is the sum of 7 and 4? What is the total of 4 and 2? $4 + 2 = 6$	2/3/5 Year 1	Counting back: tens: number lines or number track. Children start with 10 and count back.	Children represent what they see pictorially.	$4 - 2 = 2$	Year 1	Regrouping to make 10. Use ten frames and counters/ cubes or using squares.	Children draw the ten frame and counters/ cubes.	Children develop an understanding of equality e.g. $6 + \square = 11$ $6 + 5 = 5 + \square$ $6 + 5 = \square + 4$	Year 1	Finding the difference: using cubes, squares or other concrete objects which they have used or use the bar model to illustrate what they have done.	Children draw the cubes, squares or other concrete objects which they have used or use the bar model to illustrate what they have done.	Find the difference between 8 and 5. $8 - 5$ , the difference is <input type="checkbox"/> Children to explore why $9 - 6 = 8 - 5 = 7 - 4$ have the same difference.	Year 1 / Year 2	Making 10 using 10 frames, 10 squares or 10 cubes.	Children present the ten frame pictorially and discuss what they did to make 10.	Children draw how they can make 10 by partitioning the subtrahend. $14 - 4 = 10$ $10 - 1 = 9$
Year	Concrete	Pictorial	Abstract																														
2/3/5 Year 1	Combining two parts to make a whole (use resources e.g. eggs, shells, bear, cars etc.)	Children represent the cubes using dots or crosses. They could put each part into a part-whole model.	$4 = 3 + 1$ Four is a part, 3 is a part and the whole is 7.																														
Year 1	Counting in tens: number lines, squares or cubes.	It has model which encourages children to count on rather than count all.	7 is a whole number line. What is 2 more than 4? What is the sum of 7 and 4? What is the total of 4 and 2? $4 + 2 = 6$																														
2/3/5 Year 1	Counting back: tens: number lines or number track. Children start with 10 and count back.	Children represent what they see pictorially.	$4 - 2 = 2$																														
Year 1	Regrouping to make 10. Use ten frames and counters/ cubes or using squares.	Children draw the ten frame and counters/ cubes.	Children develop an understanding of equality e.g. $6 + \square = 11$ $6 + 5 = 5 + \square$ $6 + 5 = \square + 4$																														
Year 1	Finding the difference: using cubes, squares or other concrete objects which they have used or use the bar model to illustrate what they have done.	Children draw the cubes, squares or other concrete objects which they have used or use the bar model to illustrate what they have done.	Find the difference between 8 and 5. $8 - 5$ , the difference is <input type="checkbox"/> Children to explore why $9 - 6 = 8 - 5 = 7 - 4$ have the same difference.																														
Year 1 / Year 2	Making 10 using 10 frames, 10 squares or 10 cubes.	Children present the ten frame pictorially and discuss what they did to make 10.	Children draw how they can make 10 by partitioning the subtrahend. $14 - 4 = 10$ $10 - 1 = 9$																														

<p><b>Composition:</b></p> <p>1 Part-whole: identifying smaller numbers within a number (conceptual subitising – seeing groups and combining to a total)</p> <p>2 Inverse operations</p> <p>3 A number can be partitioned into different pairs of numbers</p> <p>4 A number can be partitioned into more than two numbers</p> <p>5 Number bonds: knowing which pairs make a given number</p>	<p>solve one-step problems involving multiplication and division, by calculating the answer using concrete objects, pictorial representations and arrays with the support of the teacher.</p>	<p>array, divide, repeated, addition.</p>	<p><b>Base 10 Place Value counters</b> place value grid, numicon, number lines, 100 squares.</p> <table border="1" data-bbox="1140 139 1680 409"> <thead> <tr> <th>Year</th><th>Concrete</th><th>Pictorial</th><th>Abstract</th></tr> </thead> <tbody> <tr> <td>EYFS / Year 1</td><td>Repeated grouping: repeated additions 3 x 4 3 + 4 + 4 There are 3 equal groups, with 4 in each group. </td><td>Children represent the practical resources in the picture and use a bar model. </td><td><math>3 \times 4 = 12</math> <math>4 + 4 + 4 = 12</math></td></tr> <tr> <td>KS1</td><td>Number lines to show repeated groups 3 x 4 </td><td>Represent this pictorially alongside a number line e.g. </td><td>Abstract number line showing three jumps of four. <math>3 \times 4 = 12</math></td></tr> </tbody> </table> <table border="1" data-bbox="1500 409 2129 584"> <thead> <tr> <th>Year</th><th>Concrete</th><th>Pictorial</th><th>Abstract</th></tr> </thead> <tbody> <tr> <td>EYFS / Year 1 / Year 2</td><td>Sharing using a range of objects. 6 ÷ 2 </td><td>Represent the sharing pictorially. </td><td>Children should use their 2 times table facts. <math>6 \div 2 = 3</math> </td></tr> </tbody> </table>	Year	Concrete	Pictorial	Abstract	EYFS / Year 1	Repeated grouping: repeated additions 3 x 4 3 + 4 + 4 There are 3 equal groups, with 4 in each group. 	Children represent the practical resources in the picture and use a bar model. 	$3 \times 4 = 12$ $4 + 4 + 4 = 12$	KS1	Number lines to show repeated groups 3 x 4 	Represent this pictorially alongside a number line e.g. 	Abstract number line showing three jumps of four. $3 \times 4 = 12$	Year	Concrete	Pictorial	Abstract	EYFS / Year 1 / Year 2	Sharing using a range of objects. 6 ÷ 2 	Represent the sharing pictorially. 	Children should use their 2 times table facts. $6 \div 2 = 3$ 
Year	Concrete	Pictorial	Abstract																				
EYFS / Year 1	Repeated grouping: repeated additions 3 x 4 3 + 4 + 4 There are 3 equal groups, with 4 in each group. 	Children represent the practical resources in the picture and use a bar model. 	$3 \times 4 = 12$ $4 + 4 + 4 = 12$																				
KS1	Number lines to show repeated groups 3 x 4 	Represent this pictorially alongside a number line e.g. 	Abstract number line showing three jumps of four. $3 \times 4 = 12$																				
Year	Concrete	Pictorial	Abstract																				
EYFS / Year 1 / Year 2	Sharing using a range of objects. 6 ÷ 2 	Represent the sharing pictorially. 	Children should use their 2 times table facts. $6 \div 2 = 3$ 																				
<p><b>Pattern:</b></p> <p>1 Continuing an AB pattern 2 Copying an AB pattern 3 Make their own AB pattern 4 Spotting an error in an AB pattern 5 Identifying the unit of repeat</p>	<p>recognise, find and name a half as one of two equal parts of an object, shape or quantity</p> <p>recognise, find and name a quarter as one of four equal parts of an object, shape or quantity</p>	<p>Fractions (sm step) 1&amp;1</p> <p>A half Equal parts quarter whole</p>	<p>A</p>																				

5 Identifying the unit of repeat an ABC pattern 7 Continuing a pattern which ends mid-unit 8 Make their own ABB, ABBC patterns 9 Spotting an error in an ABB pattern 10 Symbolising the unit structure 11 Generalising structures to another context or mode 12 Making a pattern which repeats around a circle 13 Making a pattern around a border with a fixed number of spaces 14 Pattern-spotting around us	6 Continuing an ABC pattern 7 Continuing a pattern which ends mid-unit 8 Make their own ABB, ABBC patterns 9 Spotting an error in an ABB pattern 10 Symbolising the unit structure 11 Generalising structures to another context or mode 12 Making a pattern which repeats around a circle 13 Making a pattern around a border with a fixed number of spaces 14 Pattern-spotting around us	<b>Measurement</b> compare, describe and solve practical problems for:   lengths and heights [for example, long/short, longer/shorter, tall/short, double/half]   mass/weight [for example, heavy/light, heavier than, lighter than]   capacity and volume [for example, full/empty, more than, less than, half, half full, quarter]   time [for example, quicker, slower, earlier, later]   measure and begin to record the following:   lengths and heights   mass/weight   capacity and volume   time (hours, minutes, seconds)   recognise and know the value of different denominations of coins and notes   sequence events in chronological order using language [for example, before and after, next, first, today, yesterday, tomorrow,	<a href="#">Measurement (sm step) I A1</a>	amount, coin, note, money, pence (p), pound (£), unitise, value, ruler, centimetres, capacity, container, non-standard, volume, half past, hour, month, o'clock, second, watch, week,	
<b>Shape &amp; Space:</b> 1 Developing spatial awareness: experiencing different viewpoints 2 Developing spatial vocabulary 3 Shape awareness: developing shape awareness through construction  4 Representing spatial relationships 5 Identifying similarities between shapes 6 Showing awareness of	2 Developing spatial vocabulary  3 Shape awareness: developing shape awareness through construction  4 Representing spatial relationships 5 Identifying similarities between shapes 6 Showing awareness of	<b>Shape</b> recognise and name common 2-D and 3-D shapes, including:   2-D shapes [for example, rectangles (including squares), circles and triangles]   3-D shapes [for example, cuboids (including cubes), pyramids and spheres].	<a href="#">Shape (sm step) I A1</a>	2D shapes Rectangle Square Circle Triangle 3D shapes Cubes Cuboids	
<b>Measure:</b> 1 Recognising attributes 2 Comparing amounts of continuous quantities 3 Showing awareness of comparison in estimating and predicting 4 Comparing indirectly 5 Recognising the relationship between the size and number of units 6 Beginning to use units to compare things 7 Beginning to use time to sequence events 8 Beginning to	2 Comparing amounts of continuous quantities 4 Comparing indirectly 6 Beginning to use units to compare things 8 Beginning to	<b>Position and Direction</b> describe position, direction and movement, including whole, half, quarter and three quarter turn	<a href="#">Position &amp; Direction (sm step) I A1</a>	far, full turn, half turn, left, near, quarter turn, right, three-quarter turn, direction	

## Year 2

Prior Knowledge- Year 1 (NC)	Year 2 NC Objectives	By the end of Year 2 children should know... (Small steps)	Vocabulary	Concrete/ Pictorial/ Abstract must haves!
<p>count to and across 100, forwards and backwards, beginning with 0 or 1, or from any given number</p> <p>I count, read and write numbers to 100 in numerals; count in multiples of twos, fives and tens</p> <p>I given a number, identify one more and one less</p> <p>I identify and represent numbers using objects and pictorial representations including the number line, and use the language of: equal to, more than, less than (fewer), most, least</p> <p>I read and write numbers from 1 to 20</p>	<b>Number and Place Value</b> <ul style="list-style-type: none"> <li>I count in steps of 2, 3, and 5 from 0, and in tens from any number, forward and backward</li> <li>I recognise the place value of each digit in a two-digit number (tens, ones)</li> <li>I identify, represent and estimate numbers using different representations, including the number line</li> <li>I compare and order numbers from 0 up to 100; use <math>&lt;</math>, <math>&gt;</math> and <math>=</math> signs</li> <li>I read and write numbers to at least 100 in numerals and in words</li> <li>I use place value and number facts to solve problems.</li> </ul>	<a href="#">Number&amp;place value (sm steps) 1A1</a>	exchange, interval, least, multiple, value,	Base 10, numicon, place value counters, number lines, 10 frames. ## Year 4

Prior Knowledge- Year 3 (NC)	Year 4	NC Objectives	By the end of Year 4 children should know... (Small steps)	Vocabulary	Concrete/ Pictorial/ Abstract must haves!				
Pupils should be taught to:  count from 0 in multiples of 4, 8, 50 and 100; find 10 or 100 more or less than a given number recognise the place value of each digit in a 3-digit number (100s, 10s, 1s) compare and order numbers up to 1,000 identify, represent and estimate numbers using different representations read and write numbers up to 1,000 in numerals and in words	Number and Place Value	Pupils should be taught to:  count in multiples of 6, 7, 9, 25 and 1000 I find 1000 more or less than a given number I count backwards through zero to include negative numbers I recognise the place value of each digit in a four-digit number (thousands, hundreds, tens, and ones) I order and compare numbers beyond 1000 I identify, represent and estimate numbers using different representations I round any number to the nearest 10, 100 or 1000 I solve number and practical problems that involve all of the above and with increasingly large positive numbers	place holder, roman, numeral, round, thousands	Number&place value (sm. steps) 1A	Base 10, numicon, place value counters, number lines, 10 frames. Place value columns.				
Pupils should be taught to:  add and subtract numbers mentally, including: a three-digit number and 1s a three-digit number and 10s a three-digit number and 100s add and subtract numbers with up to 3 digits, using formal written methods of columnar addition and subtraction estimate the answer to a calculation and use inverse operations to check answers solve problems, including missing number problems, using number facts, place value, and more complex addition and subtraction	Addition and Subtraction	Pupils should be taught to:  I add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate I estimate and use inverse operations to check answers to a calculation I solve addition and subtraction two-step problems in contexts, deciding which operations and methods to use and why.	efficient, inverse, round, thousand(s)	+ & - (sm step) 1A	Base 10, numicon, place value counters, number lines, 10 frames. Place value columns.				
Pupils should be taught to:  recall multiplication and division facts for multiplication tables up to 12 x 12 I use place value, known and derived facts to multiply and divide mentally, including: multiplying by 0 and 1; dividing by 1; multiplying together three numbers I recognise and use factor pairs and commutativity in mental calculations I multiply two-digit and three-digit numbers by a one-digit number using formal written layout I solve problems involving multiplying and adding, including using the distributive law to multiply two digit numbers by one digit, integer scaling problems and harder correspondence problems such as n objects are connected to m objects	Multiplication and Division	Pupils should be taught to:  I recall multiplication and division facts for multiplication tables up to 12 x 12 I use place value, known and derived facts to multiply and divide mentally, including: multiplying by 0 and 1; dividing by 1; multiplying together three numbers I recognise and use factor pairs and commutativity in mental calculations I multiply two-digit and three-digit numbers by a one-digit number using formal written layout I solve problems involving multiplying and adding, including using the distributive law to multiply two digit numbers by one digit, integer scaling problems and harder correspondence problems such as n objects are connected to m objects	factor, factor pair, inverse, triple, efficient	× & ÷ (sm step) 1A	Base 10, numicon, place value counters, number lines, 10 frames. Place value columns.				

<p>I recognise, find, name and write fractions: <math>\frac{1}{3}</math>, <math>\frac{1}{4}</math>, <math>\frac{2}{4}</math>, <math>\frac{3}{4}</math> of a length, shape, set of objects or quantity I write simple fractions for example, <math>\frac{1}{2}</math> of 6 = 3 and recognise the equivalence of <math>\frac{2}{4}</math> and <math>\frac{1}{2}</math>.</p>	<p>Fractions (including decimals)</p>	<p>Pupils should be taught to:</p> <p>I recognise and show, using diagrams, families of common equivalent fractions I count up and down in hundredths; recognise that hundredths arise when dividing an object by one hundred and dividing tenths by ten. I solve problems involving increasingly harder fractions to calculate quantities, and fractions to divide quantities, including non-unit fractions where the answer is a whole number I add and subtract fractions with the same denominator I recognise and write decimal equivalents of any number of tenths or hundredths I recognise decimal equivalents to <math>\frac{1}{2}</math>, <math>\frac{1}{4}</math>, <math>\frac{1}{3}</math> I find the effect of dividing a one- or two-digit number by 10 and 100, identifying the value of the digits in the answer as ones, tenths and hundredths I round decimals with one decimal place to the nearest whole number I compare numbers with the same number of decimal places up to two decimal places I solve simple measure and money problems involving fractions and decimals to two decimal places.</p>	<p>decimal equivalent, decimal place, decimal point, hundredths, improper fractions, mixed numbers, proper fractions, round, tenths</p> <p><a href="#">Fractions (sm step) 1&amp;2</a></p>		
<p>Pupils should be taught to:</p> <p>measure, compare, add and subtract: lengths (m/cm/mm); mass (kg/g); volume/capacity (l/ml) measure the perimeter of simple 2-D shapes add and subtract amounts of money to give change, using both £ and p in practical contexts tell and write the time from an analogue clock, including using Roman numerals from I to XII, and 12-hour and 24-hour clocks estimate and read time with increasing accuracy to the nearest minute; record and compare time in terms of seconds, minutes and hours; use vocabulary such as o'clock, am/pm, morning, afternoon, noon and midnight know the number of seconds in a minute and the number of days in each month, year and leap year compare durations of events (for example, to calculate the time taken by particular events or tasks)</p>	<p>Measurement</p>	<p>Pupils should be taught to:</p> <p>I convert between different units of measure (for example, kilometre to metre; hour to minute) I measure and calculate the perimeter of a rectilinear figure (including squares) in centimetres and metres I find the area of rectilinear shapes by counting squares I estimate, compare and calculate different measures, including money in pounds and pence I read, write and convert time between analogue and digital 12- and 24-hour clocks I solve problems involving converting from hours to minutes; minutes to seconds; years to months; weeks to days.</p>	<p>decimal, area, kilometres, rectilinear, width</p> <p><a href="#">Measurement (sm step) 1&amp;2</a></p>		
<p>Pupils should be taught to:</p> <p>draw 2-D shapes and make 3-D shapes using modelling materials; recognise 3-D shapes in different orientations and describe them recognise angles as a property of shape or a description of a turn identify right angles, recognise that 2 right angles make a half-turn, 3 make three-quarters of a turn and 4 a complete turn; identify whether angles are greater than or less than a right angle identify horizontal and vertical lines and pairs of perpendicular and parallel lines</p>	<p>Shape</p>	<p>Pupils should be taught to:</p> <p>I compare and classify geometric shapes, including quadrilaterals and triangles, based on their properties and sizes I identify acute and obtuse angles and compare and order angles up to two right angles by size I identify lines of symmetry in 2-D shapes presented in different orientations I complete a simple symmetric figure with respect to a specific line of symmetry.</p>	<p>equilateral, regular, irregular, isosceles, parallelogram, quadrilateral, rhombus, scalene, trapezium</p> <p><a href="#">Shape (sm step) 1&amp;2</a></p>		
<p>NA</p>	<p>Position and Direction</p>	<p>Pupils should be taught to:</p> <p>I describe positions on a 2-D grid as coordinates in the first quadrant I describe movements between positions as translations of a given unit to the left/right and up/down I plot specified points and draw sides to complete a given polygon.</p>	<p>coordinates, grid, reflection, translation</p> <p><a href="#">Position &amp; Direction (sm step) 1&amp;2</a></p>		
<p>Pupils should be taught to:</p> <p>interpret and present data using bar charts, pictograms and tables solve one-step and two-step questions (for example 'How many more?' and 'How many fewer?') using information presented in scaled bar charts and pictograms and tables</p>	<p>Statistics</p>	<p>Pupils should be taught to:</p> <p>I interpret and present discrete and continuous data using appropriate graphical methods, including bar charts and time graphs. I solve comparison, sum and difference problems using information presented in bar charts, pictograms, tables and other graphs.</p>	<p>data, estimate, line graph</p> <p><a href="#">Statistics (sm step) 1&amp;2</a></p>		

Pupils should be taught to: <ul style="list-style-type: none"> <li>convert between different units of measure [for example, kilometre to metre; hour to minute]</li> <li>measure and calculate the perimeter of a rectilinear figure (including squares) in centimetres and metres</li> <li>find the area of rectilinear shapes by counting squares</li> <li>estimate, compare and calculate different measures, including money in pounds and pence</li> <li>read, write and convert time between analogue and digital 12- and 24-hour clocks</li> <li>solve problems involving converting from hours to minutes; minutes to seconds; years to months; weeks to days.</li> </ul>	Measurement	Pupils should be taught to: <ul style="list-style-type: none"> <li>convert between different units of metric measure (for example, kilometre and metre; centimetre and metre; centimetre and millimetre; gram and kilogram; litre and millilitre)</li> <li>understand and use approximate equivalences between metric units and common imperial units such as inches, pounds and pints</li> <li>measure and calculate the perimeter of composite rectilinear shapes in centimetres and metres</li> <li>calculate and compare the area of rectangles (including squares), and including using standard units, square centimetres (<math>\text{cm}^2</math>) and square metres (<math>\text{m}^2</math>) and estimate the area of irregular shapes</li> <li>estimate volume [for example, using 1 cm<sup>3</sup> blocks to build cuboids (including cubes)] and capacity [for example, using water]</li> <li>solve problems involving converting between units of time</li> <li>use all four operations to solve problems involving measure [for example, length, mass, volume, money] using decimal notation, including scaling.</li> </ul>	<a href="#">Measurement (sm step) 1A</a>	decimal imperial, inches, metric, volume, cubic, centimetres, imperial metric, pints, pounds,		
Pupils should be taught to: <ul style="list-style-type: none"> <li>compare and classify geometric shapes, including quadrilaterals and triangles, based on their properties and sizes</li> <li>identify acute and obtuse angles and compare and order angles up to two right angles by size</li> <li>identify lines of symmetry in 2-D shapes presented in different orientations</li> <li>complete a simple symmetric figure with respect to a specific line of symmetry.</li> </ul>	Shape	Pupils should be taught to: <ul style="list-style-type: none"> <li>3-D shapes, including cubes and other cuboids, from 2-D representations</li> <li>know angles are measured in degrees: estimate and compare acute, obtuse and reflex angles</li> <li>draw given angles, and measure them in degrees (<math>^\circ</math>)</li> <li>identify angles at a point and one whole turn (total <math>360^\circ</math>)</li> <li>angles at a point on a straight line and</li> <li>use the properties of rectangles to deduce related facts and find missing lengths and angles</li> <li>distinguish between regular and irregular polygons based on reasoning about equal sides and angles.</li> </ul>	<a href="#">Shape (sm step) 1A</a>	adjacent, degrees, reflex angle		
Pupils should be taught to: <ul style="list-style-type: none"> <li>describe positions on a 2-D grid as coordinates in the first quadrant</li> <li>describe movements between positions as translations of a given unit to the left/right and up/down</li> <li>plot specified points and draw sides to complete a given polygon.</li> </ul>	Position and Direction	Pupils should be taught to: <ul style="list-style-type: none"> <li>identify, describe and represent the position of a shape following a reflection or translation, using the appropriate language, and know that the shape has not changed.</li> </ul>	<a href="#">Position &amp; Direction (sm step) 1A</a>	reflection, quadrant		
Pupils should be taught to: <ul style="list-style-type: none"> <li>interpret and present discrete and continuous data using appropriate graphical methods, including bar charts and time graphs.</li> <li>solve comparison, sum and difference problems using information presented in a line graph</li> <li>solve comparison, sum and difference problems using information presented in bar charts, pictograms, tables and other graphs.</li> </ul>	Statistics	Pupils should be taught to: <ul style="list-style-type: none"> <li>solve comparison, sum and difference problems using information presented in a line graph</li> <li>complete, read and interpret information in tables, including timetables.</li> </ul>	<a href="#">Statistics (sm step) 1A</a>	timetable, variable		

# Year 6

Prior Knowledge- Year 5 (NC)	Year 6	NC Objectives	By the end of Year 5 children should know... (Small steps) <a href="#">(1A)</a>	Vocabulary	Concrete/ Pictorial/ Abstract must haves!																																
<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>I read, write, order and compare numbers to at least 1 000 000 and determine the value of each digit</li> <li>I count forwards or backwards in steps of powers of 10 for any given number up to 1 000 000</li> <li>I interpret negative numbers in context, count forwards and backwards with positive and negative whole numbers, including through zero</li> <li>I round any number up to 1 000 000 to the nearest 10, 100, 1 000, 10 000 and 100 000</li> <li>I solve number problems and practical problems that involve all of the above I read Roman numerals to 1000 (M) and recognise years written in Roman numerals.</li> </ul>	Number and Place Value	<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>read, write, order and compare numbers up to 10,000,000 and determine the value of each digit</li> <li>round any whole number to a required degree of accuracy</li> <li>use negative numbers in context, and calculate intervals across 0</li> <li>solve number and practical problems that involve all of the above</li> </ul>	<a href="#">Number&amp;place value (sm steps) <a href="#">(1A)</a></a>	millions ten millions	Base 10, numicon, place value counters, number lines, 10 frames. Place value columns.																																
<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>I add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction)</li> <li>I add and subtract numbers mentally with increasingly large numbers</li> <li>I use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy</li> <li>I solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why.</li> </ul>	Addition & Subtraction	<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>perform mental calculations, including with mixed operations and large numbers</li> <li>use their knowledge of the order of operations to carry out calculations involving the 4 operations</li> <li>solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why</li> <li>solve problems involving addition, subtraction, multiplication and division</li> <li>use estimation to check answers to calculations and determine, in the context of a problem, an appropriate degree of accuracy</li> </ul>	<a href="#">+ &amp; - (sm step) <a href="#">(1A)</a></a>	order of operations	<p>Base 10, numicon, place value counters, number lines, 10 frames.
