# Design and Technology at Kingfisher CE Academy

**Intent:** What do we want children to learn?

At Kingfisher CE Academy, our curriculum not only incorporates the statutory elements of the National Curriculum but is also focused on developing children's creativity and curiosity. We endeavour to create learners who are appreciative, critical and inspired by all the creativity that surrounds them in this world and innovative learners who are equipped with the skills needed to succeed in such a fast-paced, ever-changing society. Children develop ideas, master practical skills and can draw inspiration from their learning across all subjects.
